I am respectfully asking you to reject the NAB's petition 04-160 and to allow me to continue to receive the XM Satellite Radio service that I pay for, since it offers me programming that I am unable to get from the public broadcasts. The traffic reports are crucial to me as I have an hour commute each way. The XM traffic reports are continuous, which means I don't have to wait 10-20 minutes to find out about a traffic condition, like I do for regular radio. The NAB should have no say in what I am permitted to hear when I am PAYING for the service. If the NAB is so concerned about this situation, they should be trying to improve the quality of the programming they offer and stop bombarding me with commercials instead of trying to squash a service that is beneficial to its subscribers.

Thank you for your time,

Lisa Frey
